

Prairie Heritage Seeds is a Saskatchewan company with over 40 years of experience working for you in the Canadian Prairies.

Our 2021 Kamut contract is now available:

Why should you consider growing Kamut?

- Kamut is drought tolerant
- average yield is around 20 to 25 bu/acres
- no production guarantee required
- market conditions are strong for the product and guaranteed movement within a year
- works well in the rotations
- no special equipment required to handle the crop
- No freight charges
